4. How to take Broncho 5 in 1 multi-symptom action syrup?
5. How to store Broncho 5 in 1 multi-symptom action syrup?
6. Contents of the pack and other information

1. What is in Broncho 5 in 1 multi-symptom action syrup and what is it used for?

Relief of any cough associated with a cold:

Broncho 5 in 1 multi-symptom action syrup is intended for the relief of any cough (dry and chesty) associated with cold, as well as sore throat due to common cold, associated hoarseness, and dryness of throat.

5 in 1: One product for the relief of five symptoms associated with cold:

- Dry cough
- Chesty cough
- Sore throat
- Hoarseness
- Throat dryness

The extracts of Icelandic Moss (*Cetraria islandica*) and Marshmallow root (*Althea officinalis*) contained in **Broncho 5 in 1 multi-symptom action syrup** act like a soothing balm that covers the affected mucous membrane of the throat. The contained mucilages form a physical protective film that keeps foreign particles away and protects the mucosa. This quickly relieves the irritation of the throat and the mucous membrane can recover. Hyaluronic acid and xanthan gum contribute to moisturisation of mouth and throat and thus support the soothing properties of Icelandic Moss (*Cetraria islandica*) and Marshmallow root (*Althea officinalis*). The combination of the ingredients also supports a longer lasting cough relief effect.
